

Akash Singh

Frontend Developer (React | JavaScript)

Nallasopara East, Maharashtra 401209 | +91 8104316760 | singhakash6412@gmail.com

PROFESSIONAL SUMMARY

Frontend Developer with 3.5+ years of experience building responsive and user-friendly web applications using JavaScript, jQuery, HTML5, CSS3, Bootstrap, and REST APIs. **Developed React.js applications through personal projects**, using components, hooks, routing, and state management. Strong focus on UI development, performance optimization, debugging, and writing clean, maintainable code.

TECHNICAL SKILLS

- React.js (Personal Projects) - components, hooks, state management, routing
- JavaScript (ES6+), jQuery
- HTML5, CSS3, Bootstrap, responsive design
- REST API integration, AJAX
- Postman, Chrome Dev Tools, Git
- Metronic admin dashboard framework
- Basic ASP.NET MVC (Razor Views)

PROFESSIONAL EXPERIENCE

Scan Infotech Private Limited | Software Developer | Apr 2024 – Jan 2026

- Develop responsive, mobile first web applications using HTML5, CSS3, Bootstrap and jQuery.
- Integrate REST APIs using AJAX and validate endpoints with Postman.
- Use MVC Razor views and ViewBag to render dynamic content.
- Improve usability, accessibility, and performance through UI enhancements.

Mindware Services | Jr. Software Developer | Oct 2023 - Mar 2024

- Designed reusable UI components and layouts using HTML, CSS and Bootstrap.
- Implemented JavaScript and jQuery for validation and interactive behavior.
- Debugged UI issues using Chrome Dev Tools to ensure smooth performance.

Poscan LLP | Jr. Software Developer | Nov 2022 - Sep 2023

- Developed and maintained client side features for responsive applications.
- Integrated APIs and handled asynchronous data through AJAX.
- Conducted testing and troubleshooting to ensure quality deliverables.

PROJECTS

- Developed and maintained interactive dashboard user interfaces using **JavaScript, jQuery, HTML5, CSS3, Bootstrap**, and **Metronic**, implementing API-driven dynamic data updates.
- Built responsive pages, forms, and reusable UI components with focus on performance, cross-browser compatibility, and client-side state handling using Local Storage.
- Collaborated closely with backend teams to ensure seamless system integration, smooth data flow, and timely project delivery using **RESTful APIs**.

- Possess working knowledge of **.NET** and **C#**, assisting in basic backend development tasks, debugging, and API support, while troubleshooting UI issues using Chrome **DevTools**.
- **Key Technologies** : **JavaScript**, **jQuery**, **HTML5**, **CSS3**, **Bootstrap**, **Metronic**, **RESTful APIs**, **Ajax**, **LocalStorage**, **Chrome DevTools**, **.NET**, **C#**.

PERSONAL PROJECTS (React)

Character Counter Application [Link – Character Counter Live](#)

- Build a React-based text analysis tool that calculates characters, words, sentences, numbers, and special characters.
- Implemented an "Exclude Spaces" option to dynamically recalculate counts without whitespace.
- Displays frequency count and percentage density of each character or number entered.
- Focused on clean component structure, state management with hooks, and real-time UI updates.

EDUCATION

B.Sc. Information Technology - Viva College	(2019-2021) - CGPI: 7.28
HSC - Viva Jr. College	(2016-2018) - 78.40%
SSC - Pancham High School	(2015-2016) - 77.60%

CERTIFICATIONS

Diploma in MS Office	(2017-2018)
Diploma in Programming (C and C++)	(2019-2020)
